TRENCHLESS TECHNOLOGY

➤ PIPE BURSTING—EXPANDIT & MINIBURST

Replace or upsize existing pipework without the need to excavate thus saving on time, disruption and ultimately cost.

➤ SPECIALISED LINING SERVICES

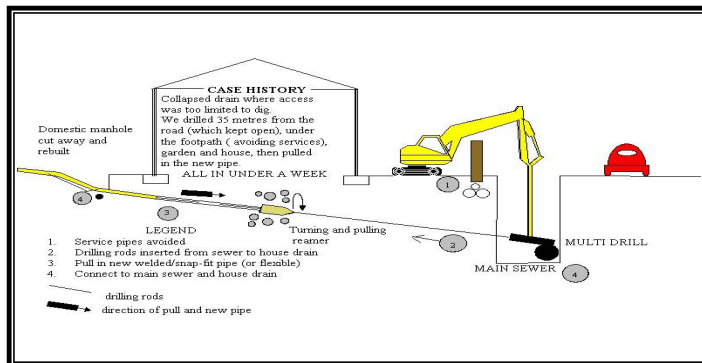

Structurally line existing pipework to create greater flow rate or repair cracked and damaged pipes using hot or cold cure methods. Specialists in difficult lining jobs i.e:

- ◆ Single entry shots under road
- ◆ Chemically sensitive pipes
- ◆ Long shots up to 400m in one insertion
- ◆ Bends, vertical stacks, hot water pipes, potable pipes, pressure pipes.
- ◆ Up to 1m diameter pipes

➤ MULTI DRILL

Install new pipes **including sewers** without the need to excavate using new drilling technology. Cutting mess, disruption, time and cost. Drill under buildings and roads with out the need to excavate a trench.

➤SITE INVESTIGATIONS

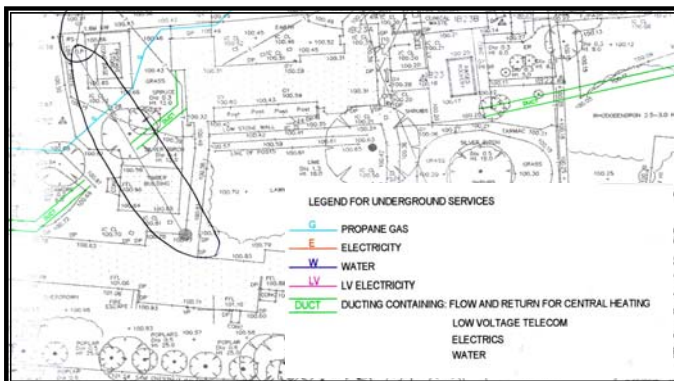

Carry out all forms of site investigation work from CCTV surveys to pipe tracing and radio trisponder pipe detection.

➤UNDER PRESSURE DRILLING

Drill into a main or vessels without the need to depressurise thus reducing disruption caused by conventional repair methods.

➤TOPOGRAPHIC SURVEYS

Site surveys showing levels, buildings, vegetation, boundaries etc. Overlay underground services which are located and traced.

➤DEEP SHAFT WORK

Qualified to install reinforced shafts to various depths and diameter

➤LASER GUIDED AUGER BORING

Install new gravity sewers, cold water pipes, gas pipes and electric cable ducts without the disruption caused by traditional methods such as excavation. Accurate to +/- 10mm over runs of 100m.

➤PIPE TRACING

PLASTIC PIPE TRACING. We can trace plastic underground pipes for depth and location. No other company can offer this facility.

For more information on any of the services we provide please contact the office on the numbers or e-mail listed overleaf.
